Professional Summary

AWS-focused QA Automation Engineer with 5+ years of experience in Java-based test automation, backend development, API testing, CI/CD pipelines, and cloud-native solutions. Skilled at building resilient automation frameworks, improving delivery velocity, and maintaining test quality across enterprise applications.

Core Skills

Selenium WebDriver, TestNG, JUnit, REST API Testing, Java, Spring Boot, AWS, Jenkins, GitHub Actions, Docker, Kubernetes, Test Automation Architecture

Experience

Software QA Engineer, Infosys Limited (Client – Cisco Systems)

- Designed and enhanced a scalable Selenium WebDriver + TestNG automation framework for UI and API testing.
- Expanded automation coverage for business-critical workflows including Quote-to-Order, Order-to-Invoice, and Standalone Order.
- Integrated automation with Jenkins CI/CD pipelines to enable faster build feedback and improved stability.
- Reduced flaky tests and improved execution consistency for reliable release validation.

Java Developer, Addvic Technologies Private Limited

- Developed RESTful APIs using Spring Boot and Spring Framework.
- Built microservices and integrated data persistence with MySQL and Hibernate.
- Implemented caching, validation, and exception handling for stable backend systems.

Project Engineer, IMAX Electrotek Private Limited

- Managed requirement analysis, client communication, and project coordination.
- Supported delivery and reporting for multiple ongoing assignments.

Education

Bachelor of Engineering in Mechanical Engineering – Government College of Engineering, Pune

Certifications

AWS Certified Cloud Practitioner
